

**Productivity comes with Safety**

Drs. Robert P. van Schagen

BHA, MHSc, Insead IEP, IMD PED

# Safer

Around 20.000 unnecessary deaths in EU healthcare each year.....

..... Comparable with **60** Boeing 747's a year coming down in EU airspace alone.....

Would you still fly?

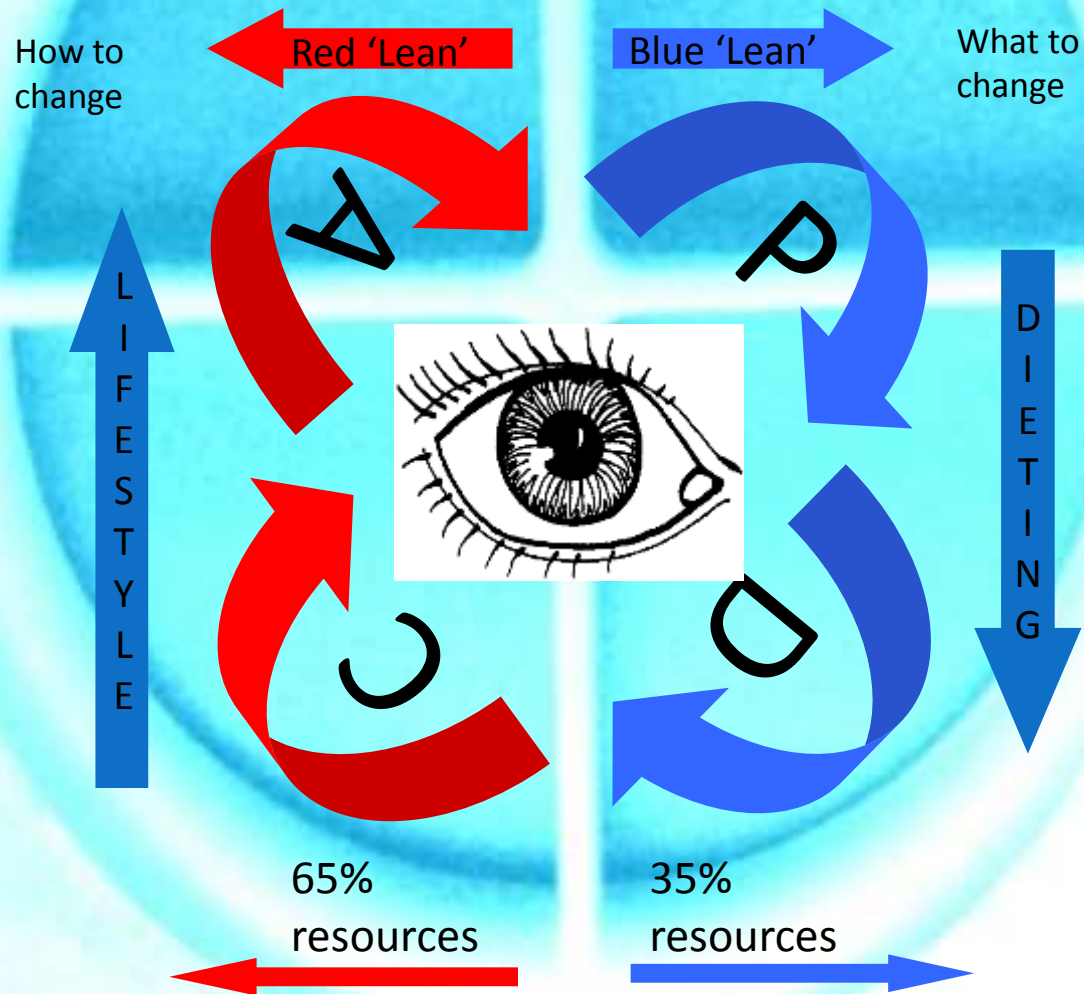

# More Productive

# What to change and how to change....

# Dieting or lifestyle change?

# How? No grand design, 1000 little improvements....

# Step 1; Standard work; know what you are doing and verify

PH-ANI-5.51-pro5-stw GROSSING PROCEDURE STANDARD WORK  
**Step by step QC for Patient & Tissue ID**

1) Start with tray of cases

2) Gross one case at a time

3) Scan CoPath label

4) Check patient name on CoPath label vs. patient

5) accessioned

Visueel standaard werk voor de laboranten, zelf ontwikkeld en regelmatig verbeterd!

Standard work met current status op een verpleegafdeling zonder privacy discussie.

# Step 2; Use your incidents to improve tomorrow

**FSI: We approach each fall as if it were a crime that needs to be solved:**

**Step One → Step Two → Step Three**

1. Gather the clues and evidence by observation, examination & collection.
2. Investigate and analyze; Why did they fall? Determine the root causes or reasons for the fall.

ons (interventions)

## SAFETY

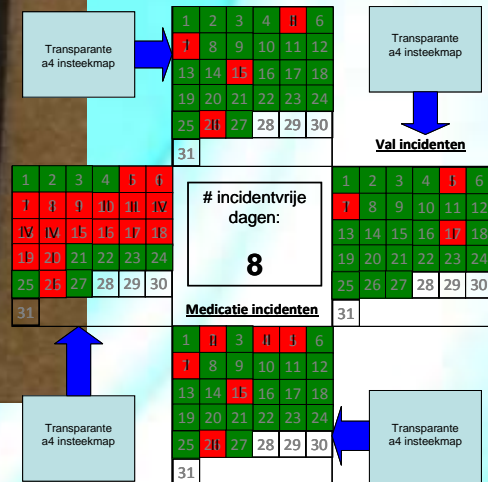

Het veiligheidskruis, ook de leverancie kunnen niet zonder in de zorg

Via veiliger productiever!

PATIENT SAFETY COMES FIRST

iger productiever!

# How to change; A3 thinking

**Titel:** Bondige formulering van het probleem, een dirty story!

**Organisatie:** afdeling

**Aanleiding:** Waarom werk je hieraan? Wat draagt dit bij aan jullie true north?

**Current Situation**

**Huidige situatie:** Hoe is het nu? Volgens wie? Is er data? Ben je gaan kijken op de werkvloer? Is er 1 gezamenlijke kijk op de werkelijkheid of zijn er meerdere?

**Target Situation**

**Doel situatie:** Waar wil je staan? Volgens wie? Voor wie? Klant of van jou?

**Root Cause**

**Belemmering:** wat maakt dat de doelsituatie nog niet is bereikt? Wat verhindert jou of je collega's? Wees specifiek!

Why (x5)?

**Teamleden:** Namen en functies van de teamleden

**Datum:** Datum start A3 en geplande einddatum

**Tegenmaatregelen:** welke maatregelen hebben de belemmeringen voor jou en je collega's op? En in welke mate (%)?

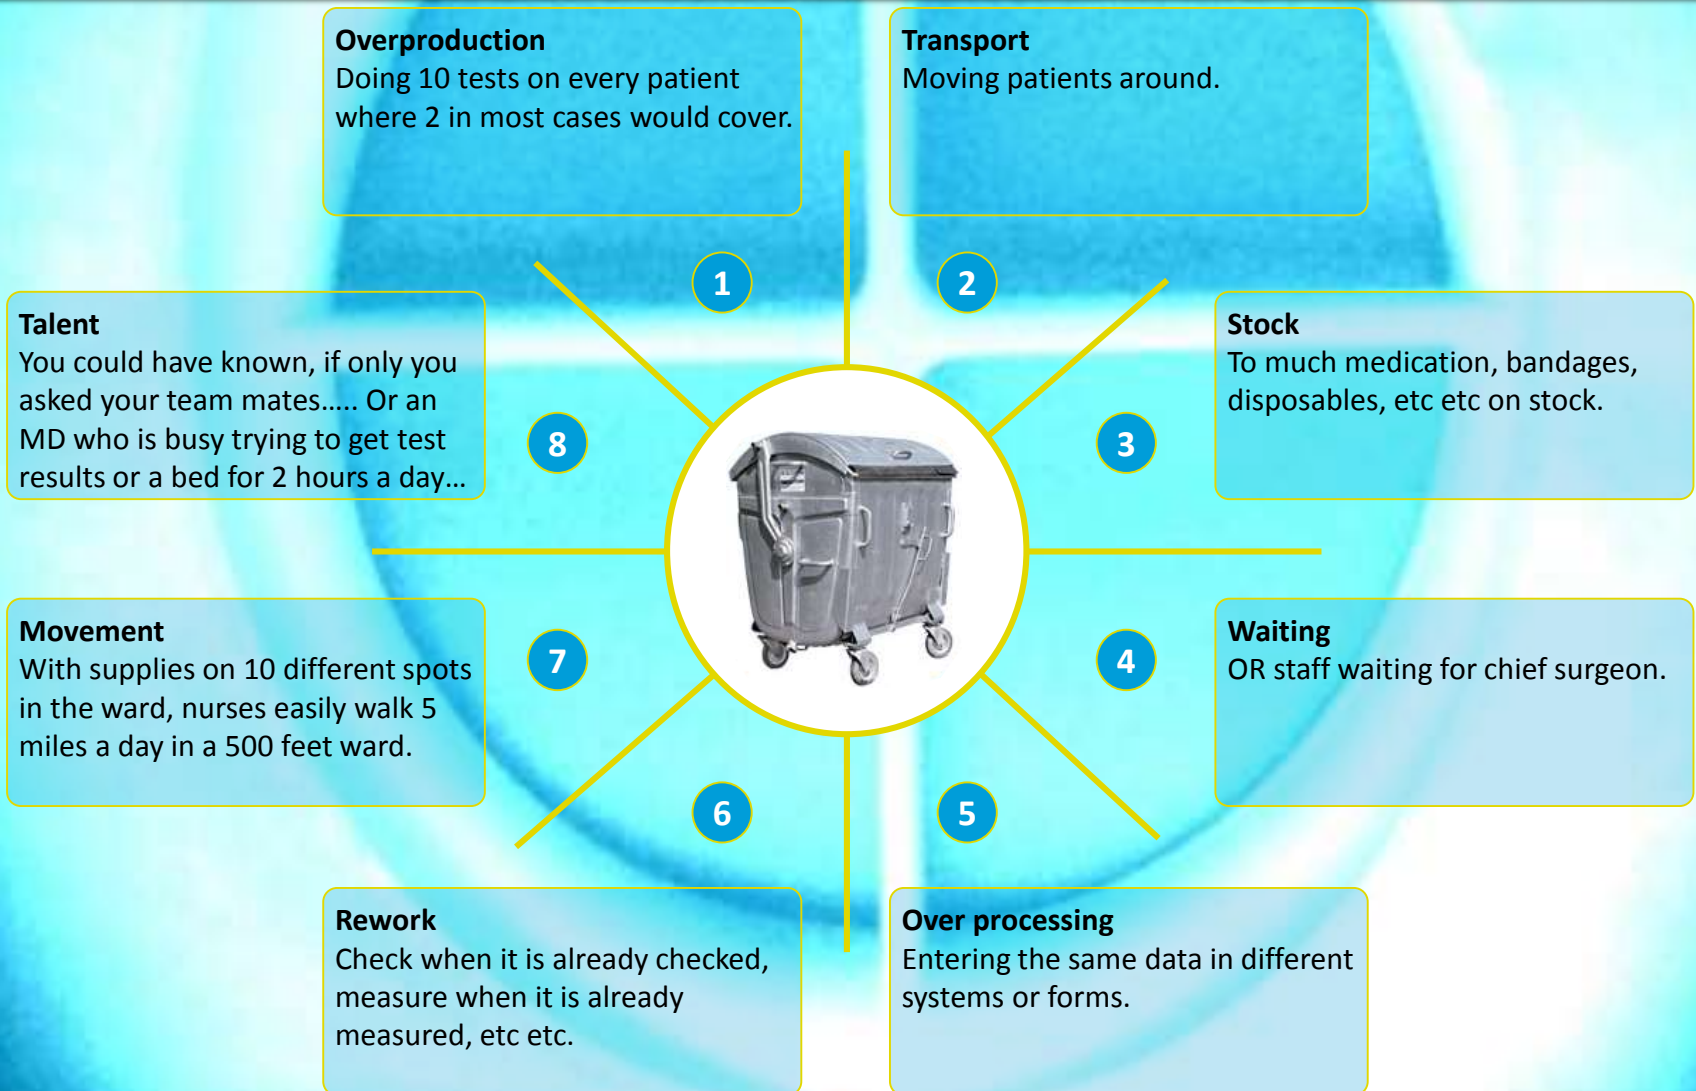

**Counter Measures**

**Actieplan:** wie, gaat wat doen, wanneer en met welke middelen tegen welke prijs?

**Action and Measurement**

**Opvolging:** Hoe en wanneer wordt duidelijk dat tegenmaatregelen de belemmering hebben opgeheven? Hoe gaan we dat meten? Wat zijn de verwachte uitkomsten?

# Out of the comfort zone 1: adding value by removing something instead of adding something.

# Out of the comfort zone 2: horizontal instead of vertical

Vertical budgets

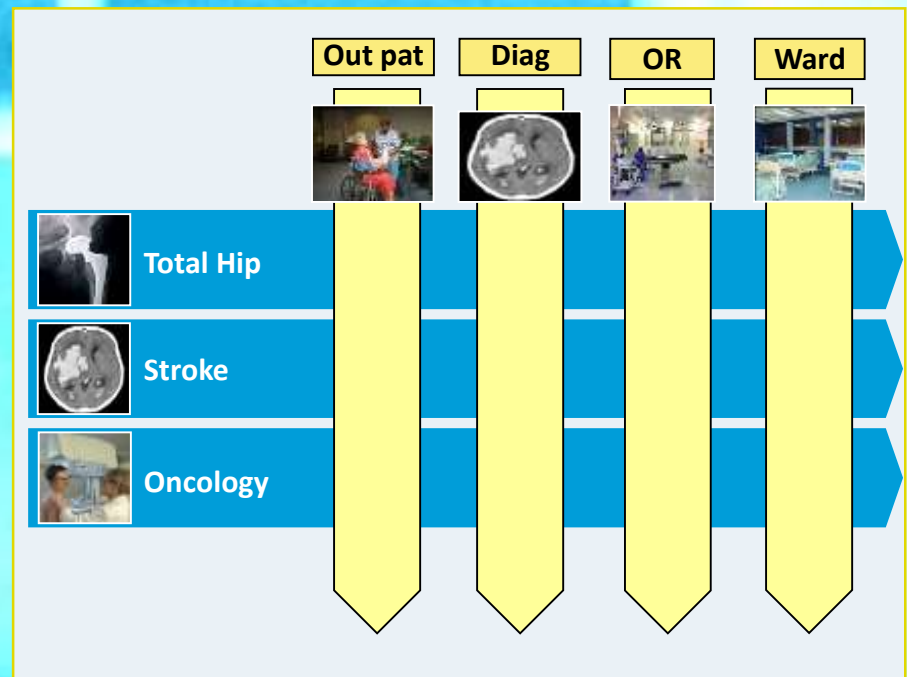

Vertical MD alliances

Vertical managers

Vertical teams

Vertical power

Before Lean.....

## After Lean.....

**Productivity comes with Safety!**

# Workshop rules

1. Productivity comes with safety; get as many balls from the S bucket to the F bucket without dropping them on the floor (that will be considered an accident)
2. Only one person is in charge of admitting (S bucket) and discharging (F bucket) the balls, nobody else can touch the buckets and the balls in&out (that will be considered an accident)
3. A ball can only move from team member to team member by throwing, no handing over permitted (that will be considered an accident)
4. Every ball completing the process must have been in all team members hands (left&right), any ball who missed a hand will be considered to be in an accident
5. Any ball involved in an accident will be taken out of the game by the observer
6. 3 production rounds of 2 minutes, 3 improvement rounds of 5 minutes (strangely this workshop is about improving, not competing ;-))
7. Best score ever is 97% (100 minus all balls in accidents)
8. 200 balls for 10 team members, any team member extra reduces the number of balls with 10, with a minimum of 100 balls

# Workshop hints

1. This is about “productivity comes with safety”, so please invest in accident free (according to the workshop rules) processes
2. Reduce waste, remember the sheet about the 8 types of waste?
3. To improve, you need a standard first, remember? Is everybody in your team aware of the same standard, does the standard work for all team members?
4. What about incidents, did you notice them? Did you use them to improve your process?
5. PDCA is all about experimenting, and go through the cycle over and over again, no time for endless discussion about the best redesign. Please experiment during your improvement time!
6. Do you remember the “A3” sheet? First current situation (A), then target situation (B), what is keeping you from moving from A to B? Share that with each other, these are the issues to tackle first!

# Productivity comes with Safety!
